

## CHILDREN'S DENTAL HEALTH LAUNCHES ORTHODONTIC SERVICES FOR FULL CONTINUUM OF ORAL CARE

WEST CHESTER, PENNSYLVANIA (July 18, 2018) – Children's Dental Health is pleased to announce the addition of orthodontic services to its comprehensive pediatric oral health offering. This milestone signifies expansion to a full continuum of care approach, providing a complete dental home for patients to achieve not only healthy, but beautiful smiles that support confidence in growing children.

"Orthodontics complements our pediatric dental offering and provides convenience for busy families, allowing children to obtain dental and orthodontic treatment under one roof," states Julie Amos, Vice President of Dental Operations, "We're also pleased to accept Medicaid and CHIP plans, and know this will improve access for patients who have found it difficult to obtain the orthodontic care they need."

"Patients will continue to benefit as our pediatric dentists and orthodontists are able to work collaboratively and share pertinent information to more efficiently manage a patient's oral health care," explains orthodontist, Jennifer Smith, D.M.D. Orthodontic services are now offered at the following eight Children's Dental Health practices and will soon expand to more locations:

- Bensalem
- Chadds Ford
- Harrisburg
- Lancaster
- Mechanicsburg
- Warrington
- West Grove
- York

The American Association of Orthodontists recommends children visit an orthodontist by the age of seven. By the time a child has reached this age, enough permanent teeth have emerged for a skilled orthodontist to pinpoint any potential issues. Additionally, teeth are still developing and the jaw is still growing, making certain conditions, such as crowding, easier to address.
